

WOW AWARD

Maroti Raghunath Shelke

Maroti is a junior data scientist and working on the Fuel On Demand project for the code improvements to enhance performance and maintainability. He worked on report creation for FOD (Fuel On Demand) failure SNS log notification. Retrained the model and generated a model report on a quarterly basis. Also, in the PLSR project he developed the clustering model to access the silica in the bauxite and anomaly detection model to detect the anomalies.

Nominated by Makarand Patil for Talent Magnet
